

Management and Engineering Technologies International, Inc. (METI) is a Small Disadvantaged Business headquartered in El Paso, Texas with two decades of experience providing professional support services. METI offers Advisory and Assistance Services (A&AS); Test and Evaluation (T&E); Information Technology (IT); and Natural Resource Management services. We support the Department of Defense, Department of Agriculture, and other Federal agencies internationally.

METI

...a Merging of Excellence

Advisory & Assistance Services

METI has a successful history of providing A&AS throughout the lifecycle of a Program to our customers. Our services include: Program Management; Acquisition Life-Cycle Management; Research & Development (R&D); T&E; Configuration Management; and Logistics Support and Fielding. We also provide analytic assessments to help our customers better understand and/or evaluate complex issues in order to improve decision-making, management, and administration. We provide systems engineering and technical services related to various concepts for new and modified systems, equipment, and programs.

Test & Evaluation

METI provides comprehensive T&E services for numerous systems. METI provides a full range of T&E services including: planning; test article prototype & fabrication; test set up and execution; modeling & simulation, purchasing, and inventory. We support the integration of weapons and avionics on tactical aircraft; development & application of new technology to ensure battle space dominance; and conducted vulnerability, lethality, safety, and aerodynamic testing. METI plans, conducts, and analyzes the results of Technical Tests for C4ISR systems, Signals Intelligence, and Electronic Combat/Electronic Warfare equipment and conducting developmental tests.

Natural Resource Management

METI applies innovative management and technology solutions to improve productivity and reduce costs for USDA Forest Service programs. We support International Programs, and R&D to include sampling, modeling & analysis and concept development. METI also supports inventory and monitoring, operations & management, graphic design, training, and disaster assistance & recovery. Our personnel have extensive experience in applying emerging tools and techniques to assist managers to enhance the management and sustainability of the national forests and grasslands.

Information Technology

METI provides a full spectrum of IT services in a process-driven environment. METI's capabilities allow our customers to meet industry challenges with optimum efficiency and security as our employees focus on each project with quality time and management. Our support includes: Enterprise Architecture; Systems Engineering & Administration; Help Desk Support; Configuration & Data Management; Application Development; Website Design & Development; Cyber Security & Information Assurance; Network Engineering & Administration; Operation & Maintenance and Certification & Accreditation.
