One Acquisition Solution for Integrated Services

## The **SUBSYSTEMS®** Difference™

### » Our Culture

At Subsystem Technologies, Inc. (SUBSYSTEMS), we pride ourselves on delivering innovative, cost effective engineering and program management solutions to the Federal government. SUBSYSTEMS engineering includes a wide range of disciplines spanning the physical sciences and information technology. We also excel in varied management consulting services such as project management (which we do and train clients in doing), financial analysis, and acquisition services. We are expanding our IT experience with burgeoning cyber security and advanced analytics functions – again, staying current and innovative in the industry. We combine technologies for innovation and bring the new creative solutions such as cyber security and related big data cyber threat analyses, to the clients. Security and safety have translated into unique solutions and services for the Military/Defense, Intelligence, Homeland Defense, Justice, and Aviation departments of the federal government.

We provide clients with time-tested current strategy and leadership. We bring the best talent in the market to federal programs and then measure our success based on the highest achieved client metrics. SUBSYSTEMS is organized to facilitate what we do best - seek and provide new and emerging technologies for robust and cost-effective systems, innovative solutions, and quality service to effectively and efficiently meet client needs. During our nearly three decades of business with the federal government, we have successfully provided a broad range of Information Technology (IT) Services, Information Security Services, Engineering Services, and Enterprise Program Management support to a diverse client base. In addition to our long-term client relationships, employee retention at SUBSYSTEMS is outstanding.
