## A Proven Industry Leader You Can Rely On

Our identity and our heritage: testimony to our ability. Honeywell Technology Solutions Inc. (HTSI) is a diverse professional and technical services leader offering world-class competencies in management, defense and space operations, engineering and development services, logistics, health services, information technology, security, and testing and calibration. Our deep industry knowledge, domain expertise, operational know-how, and strong emphasis on quality and safety ensure we deliver innovative, best-value services and products across our diverse customer base.

For more than a half-century, HTSI has provided outstanding professional and technical services in support of critical missions worldwide. Our lineage dates to the 1950s as Bendix Field Engineering. Today, HTSI is a wholly-owned subsidiary of Honeywell, and is the company's largest provider of professional services. As a business unit of Honeywell Aerospace, we draw upon the vast capabilities of this leading global provider of integrated avionics, engines, systems, and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space, and airport operations.

HTSI's leadership in the industry stems from our extensive offering of products and services and systematic application of world-class technologies and problem-solving methodologies. Our employees, steeped in Six Sigma process improvement principles, keep pace with the rapidly changing technological environment through aggressive training programs. Our customer base includes the National Aeronautics and Space Administration (NASA), the Department of Defense (DoD), Department of Energy (DoE), Department of Homeland Security (DHS), Federal Aviation Administration (FAA), other U.S. government agencies, foreign governments and some of the world's largest corporations.

Working in partnership with our customers, we support critical missions throughout the United States, around the world and in space.

### "Do the Right Thing – Every Time, All the Time"

We deliver the best solutions to our customers through our biggest asset – our people. We believe that honest and ethical behavior is imperative to successful operations and future growth. At HTSI, we expect our people to "Do the Right Thing – Every Time, All the Time". It's our culture, it's the way we do business, and it's our promise to you.

## Space Engineering and Operations

HTSI has provided space system engineering and operations services to NASA, the U. S. Air Force and other government agencies for more than 50 years. We are the leading provider of engineering, operations and maintenance support for the Air Force Satellite Control Network (AFSCN). Our success with government satellite missions is unmatched in the industry.

Our areas of expertise include:

- *Space and Mission Operations*
- *Satellite Communications Network Engineering*
- *Program and Project Management*
- *System Deployment and Operations*
- *Total Life-Cycle Management*
- *System Sustainment*
- *Technology Refresh*

## Logistics

Honeywell offers Total Logistics Support consisting of:

- *Expeditionary Logistics*  
Covering supply chain, data analysis, inventory management and asset visibility, transportation and warehouse management, and kitting, testing and calibration for prepositioned and war reserve assets..
- *Augmentation Support*  
Property book operations, left-behind equipment, total package fielding support.
- *Depot Partnership Logistics*  
Includes our award-winning performance-based and Total Logistics Support contracting solutions centered around Honeywell products.
- *Service Product Integration Logistics*  
Combines the expertise of all our logistics offerings into one Total Logistics offering. Our sustainment services range from sustaining large, complex networks to keeping small sets of legacy equipment operational.

## Security Solutions

We deliver project management and engineering professional services and full life-cycle solutions in:

- *Cyber Security*  
Network security engineering, policy, procedures, training, certification and accreditation, sustainment, information operations, and Web site/portal development.
- *Physical Security*  
Design, installation and sustainment of perimeter security and operations centers, staging and maintaining antiterrorism force protection and personnel protective equipment.
- *Field and Systems Engineering*  
Architectural services, systems integration, mobile assured communications and data acquisition, seismic monitoring solutions, and airspace management.
- *Business Quality Services*  
Inspection and audit, metrology services, asset management, supplier quality assurance and factory acceptance testing.

## Health Services

Our Honeywell Operating System (HOS) enables our culture of continuous improvement so that we may enhance cost savings and mitigate risk. Our areas of expertise include:

- *Logistics & Communications*  
Outfitting healthcare facilities, complete supply chain, low voltage communication systems
- *Asset Tracking (AT) & IT*  
Intelligent & Visible AT, Defense Medical Logistics Standard Support (DMLSS), Global Asset Management (GAM), Honeywell Enterprise Analytic Reporting & Tracking Solution (HEARTS), Information Technology
- *Security*  
Command centers, cyber security operations centers, electronic physical security, cyber security
