"Credence exceeded the government's expectations...saving the government sustainment costs...[Credence's] invaluable input quickly resolved issues and improved capability...The Credence team has been an invaluable resource in facilitating an excellent working relationship with Government...and other contractors...The team provided excellent functional and technical support...as well as superb knowledge and understanding of DoD and Air Force..."

—ACAT I Program Manager, US Air Force

As the recipient of several of the first task orders under the OASIS program, Credence is your ideal partner for OASIS SB. Our differentiators include our broad portfolio of prime contract work across all OASIS domain areas; our robust infrastructure to support large-scale, complex assignments for Federal customers; our flat structure to allow for rapid, agile responses; and our exceptional CPARS evaluations.

Credence is the leader amongst small businesses in providing innovative management, technology, and engineering solutions to Federal government clients—delivering results quickly and cost effectively.

Credence has successfully supported US government customers since 2005, with 95 percent of our work being performed as a prime contractor and with exceptional past performance references. With a wide footprint across the Federal government, our areas of expertise span the following domain areas: Program Management, Management Consulting, Engineering, Scientific, Logistics, Financial, and Human Capital.
